Strategic Direction for 2025

Executive Objectives 2025

Strategic Pillars and Organizational Transformation

Brand Identity: Redefining the Bank’s brand identity and delivering a unique and distinguished experience for both internal and external customers, thereby strengthening Bank of Jordan’s position in the regional market as an innovative and future-ready bank.

Retail Banking: Offering an innovative banking experience that is aligned with the evolving needs of customers, with a targeted focus on specific customer segments.

Corporate Banking: Positioning Bank of Jordan as a leading institution in the corporate banking sector by providing added value that empowers clients to excel and exceed expectations, making the Bank their preferred and trusted financial partner

Human Resources: Advancing the human resources framework to enhance the employee experience, thereby supporting organizational performance and positioning Bank of Jordan as a preferred employer over the next three years.

Environmental and Social Sustainability: Enhancing the Bank of Jordan’s status as a leading financial institution through the integration of sustainability practices into its operations, while contributing to a positive impact that reflects excellence in institutional performance.

Financial Pillar

Achieving Financial Growth: Increasing revenues and meeting financial targets by developing new strategies aimed at enhancing profitability.

Reducing Financial Risks: Strengthening collection policies and credit provisioning to ensure financial sustainability

Enhancing Financial Management: Improving performance review mechanisms for budget analysis, and conducting monthly financial reviews to ensure the accuracy of financial planning.

Executive Objectives 2025

Market and Customer Pillar

Enhancing Customer Satisfaction and Market Share Through

Implementation of Regional Expansion Plans in the Following Markets

Redefining Bank of Jordan’s Brand and Customer Experience

Environmental and Social Sustainability

Operations Pillar

Launching an innovation center in partnership with local and regional financial technology companies to deliver value-added, innovative services to clients, thereby enhancing the Bank’s differentiation and responsiveness to changing market demands.

Improving operational efficiency through the adoption of innovative technologies such as automation, data analytics, and artificial intelligence, which contribute to reducing processing times and improving the accuracy of decision-making.

Executive Objectives 2025

Human Resources Pillar

Implementing a talent management project Group-wide, aimed at supporting succession planning and mapping career paths for employees, thereby contributing to high-performance outcomes.

Developing employee capabilities to support performance excellence in line with the Bank's institutional transformation efforts, which includes the establishment of a digital learning and development platform.

Enhancing the performance evaluation framework to improve the Bank's institutional performance and ensure the effective achievement of strategic goals.

Upgrading the electronic human resources management system to serve as a reliable data foundation for informed decision-making.

Customize user entitlements / limits on product level and account level.

Ability to hide / mask salary file details for selected users.

Create up to 8 different authorization group levels (A,B,C,D,...).

Unlimited number of user creation.

Cash & Cheque Deposit Machines (CDM's) by BRINKS

Following the successful implementation and growing demand for Smart, instant Cash Deposit Services and post-dated Cheques safe box in Jordan, we are evaluating regional expansion into Iraq, Palestine, and Bahrain. This initiative reflects our commitment to innovation and extending value-added services across our regional network.

Automated reconciliation between BOJ clients and their vendor accounts can be efficiently implemented through integration with the BOJ client's financial system via the Cash Deposit Machine (CDM) system. This integration streamlines financial operations, reduces manual processing, and improves the accuracy of transaction matching.

Trade Finance

We offer a comprehensive range of Trade Finance services designed to meet the needs of businesses and support their trade operations both locally and internationally. These services are managed by a specialized team within the Transactional Banking Division, supported by highly skilled operations staff to ensure precise and timely execution.

Our Trade Finance Sales Managers provide clients with expert consultation and develop flexible, value-added solutions that contribute to the growth and sustainability of their businesses.

New Product Development:

We have launched a range of new initiatives designed to offer value-added services that help clients manage their trade operations more efficiently. These solutions focus on risk mitigation and improving liquidity. Notable examples include Supply Chain Financing, Receivables Discounting, and both Pre-shipment and Post-shipment on Letters of Credit (LCs) trade funding.

Revenue Growth:

The Trade Finance unit has demonstrated consistent improvement, achieving a rise in client demand, effective execution of our business strategy, and higher volumes of cross-border transactions.

Digital Trade Platform Adoption:

Our Trade Finance features on the digital platform have received positive feedback from clients, improving accessibility, and overall client engagement across our services.

Operational Efficiency Gains:

Significant improvements have been made in transaction processing speed and reliability. Through process optimization and digital transformation, we have enhanced the client experience and reduced operational costs.

Client Base Expansion:

With stronger risk management practices in place, the quality of our trade finance portfolio has improved, ensuring a more stable and resilient financial performance. The unit has successfully expanded Bank Of Jordan's client base, which solidifies our position in the market and enhances our competitive edge.

Securities Services

(Custody & Clearing)

Bank of Jordan is the first local Bank in the Kingdom to offer custody and clearing services, laying the foundation for a secure and integrated investment experience for foreign institutional investors in the Jordanian market. The Bank has developed a comprehensive framework that includes advanced technical infrastructure along with well-defined policies and procedures, ensuring the delivery of this service with high levels of efficiency and reliability.

This service provides investors with a key advantage — the ability to conduct their operations within a regulated legal environment that guarantees service continuity and protects their investment rights with full transparency.

Since the establishment of this service in 2014, Bank of Jordan has continued to reinforce its position in this field through its ongoing commitment to supporting the investment environment and advancing the financial infrastructure in the Kingdom.

An experienced and
specialized team

Liability Management

We provide specialized banking services tailored for non-borrowing companies—those without granted credit facilities—by efficiently and transparently managing their term deposits and current accounts. Our dedicated team delivers flexible Banking solutions and competitive interest rates designed to meet client needs, strengthen relationships with the Bank, and support business continuity and customer satisfaction.

Key Benefits of Liability Management Services:

- Offering competitive interest rates on term deposits to ensure optimal returns for clients
- Efficient and reliable management of deposits for non-borrowing companies
- Managing current accounts and providing comprehensive solutions that streamline daily financial operations and enhance the overall client experience

Financial Institutions

The Financial Institutions Department at Bank of Jordan is a key pillar of the bank's institutional banking platform, driving both regional and international expansion. The department is organized into three specialized units—Correspondent Banking, FI Business Development & Trading Desk, and Non-Bank Financial Institutions (NBFIs)—each focused on distinct client segments, products, and market activities.

The department leads the formulation and execution of strategic initiatives aligned with shifting market dynamics, while fostering institutional relationships that support the bank's trade finance, treasury, and correspondent banking operations.

Through the Correspondent Banking unit, the department manages an extensive and expanding network of global financial partners, along with a broad portfolio of nostro and vostro accounts that facilitate the bank's international operations in Jordan, Palestine, Iraq, Saudi Arabia, and other key markets. This unit also delivers trade finance services—such as letters of credit, guarantees, and discounting—and ensures strong compliance, risk oversight, and accurate reporting related to international transactions.

The FI Business Development & Trading Desk is responsible for originating and executing primary and secondary trade finance transactions, in addition to leading syndication and distribution efforts in cooperation with domestic, regional, and international banks. It offers solutions including LC confirmations, LG reissuance, and secondary market trading of trade finance instruments for both financial institutions and corporate clients. This desk also conducts in-depth market research and analysis to support data-driven decision-making. A notable strength of the department lies in its ability to secure trade-related financing and participate in risk-sharing arrangements, allowing it to function as a self-sustaining, revenue-generating unit aligned with the bank's trade strategy.

Financial Institutions

The Non-Bank FI unit provides comprehensive coverage of insurance companies, money service businesses (MSBs) such as exchange houses, sovereign wealth funds (SWFs), pension funds, and other non-bank financial institutions. It offers customized solutions including cash and liquidity management, financial markets products, guarantee structures, and custody services, particularly for sovereign and regional institutional clients.

In close coordination with the Treasury Department, the Financial Institutions team also plays a proactive role in promoting and sourcing financial products—facilitating access to international counterparties for foreign exchange and money market operations, while simultaneously cross-selling Bank of Jordan’s own local currency FX solutions to peer institutions. This reciprocal model enhances execution capabilities, expands market presence, and strengthens the bank’s overall treasury ecosystem.

The department also upholds a high standard of compliance and risk management, executing stringent due diligence and KYC procedures. It supervises accounts for exchange companies, manages U.S. Federal Benefit Unit (FBU) disbursements in Jordan and Palestine, and oversees the review and execution of key institutional agreements, including ISDAs, MRPA’s, and custody arrangements.

With its specialized structure, strategic focus, and operational independence, the Financial Institutions Department is a cornerstone of Bank of Jordan’s international banking strategy—reinforcing its standing as a trusted and agile partner within the global financial landscape .

Global Financial Institutions Department structured into the below three specialized units:

- Correspondent banking.
- FI Business Development trading desk.
- Non-Bank FI .

Central corporate customer service department

Our journey began a year and a half ago with a foundational team of 12 dedicated employees, transitioned from various departments to serve as our initial CCCS officers. Since then, we have successfully expanded our ranks, welcoming an additional 14 employees to our team. To ensure our team's continuous excellence, This course is now a cornerstone of our professional development, designed to be taken annually by all team members, ensuring a unified and highly skilled approach to client service. Our team now consists of 6 senior officers and officers, distributed across the eleven SME centers located in the North, South, and Central regions of the kingdom. Additionally, a core team of one senior officer and five officers is based at our headquarters.

What Do We Do and Why Are We Here?

As the central point of contact between Relationship Managers, processing departments, and our valued clients, the CCCS department manages client requests and inquiries efficiently and professionally. Our role is to improve the services we provide to our corporate clients by ensuring seamless coordination across all touchpoints.

We are committed to delivering unified, exceptional service in a timely manner, fully compliant with bank policies and Central Bank of Jordan (CBJ) regulations. Our efforts go beyond resolving immediate issues—we aim to identify root causes and propose reengineering procedures where needed, ensuring a long-term, sustainable approach to client satisfaction and operational excellence.

BOJ Information Security Program

Bank of Jordan is committed to maintaining a strong cybersecurity position by adhering to internationally recognized standards and frameworks, in addition to local and regional authoritative regulatory requirements.

Bank of Jordan achieved second place among all banks and financial institutions in Jordan that participated in the interactive cyber-attack tabletop exercise conducted by the Central Bank of Jordan.

Sustainability

Sustainability at Bank of Jordan

As part of our ongoing strategic transformation, Bank of Jordan is integrating Environmental, Social, and Governance (ESG) principles across all aspects of our business to build long-term value and enhance future resilience.

We are aligning with leading global ESG standards to promote greater transparency, strengthen governance, and contribute to a more inclusive and sustainable economy. By embedding ESG into our core strategy, we are developing responsible financial solutions, fostering ethical business practices, supporting community well-being, and proactively addressing environmental risks.

This commitment positions Bank of Jordan to meet evolving international expectations, contribute to national development goals, and play a leadership role in accelerating ESG progress within the regional banking sector.
